

INTEGRATE 80+

Soil Surfactant

NONPLANT FOOD INGREDIENT(s):

83.00%	Tri Block Co Polymer
17.00%	Inert Ingredients
100.00%	TOTAL

WARNING: KEEP OUT OF REACH OF CHILDREN

HAZARD STATEMENT: May Cause Eye Irritation

Before using this product read the entire label and precautionary statements

GENERAL INFORMATION

Integrate 80+ improves initial wetting and subsequent rewetting of soils. Integrate 80+ is effective on a wide range of soil types from coarse to loamy clay soils and will ensure maximum uptake of water on hydrophobic soils. Integrate 80+ will provide uniform penetration and lateral movement of water.

Integrate 80+ is labeled for use on all agricultural crops and will modify the way water and soil interact making the water more plant available.

Integrate 80+ can also be applied to turf including golf course greens, tees and fairways, athletic fields as well as production sod.

Integrate 80+ is effective in wetting various media substrates including peat, pine bark, and coconut coir in protected agriculture, nursery and greenhouse applications.

DIRECTIONS FOR USE

Agricultural Crops: Initial application: 1 pint to 1 quart per gross acre either injected in 100-200 gallons of water or blended in the first load of liquid fertilizer for that respective block of acres of production dedicated to that pump station.

Subsequent applications at 0.5 – 1 pint per month per gross acre either injected or blended with liquid fertilizer regardless of the volume of fertilizer being fed. For example: If you feed every other day in a given month, divide 1 - 2 pints per acre in the block/pivot/field and divide that by 15 days of fertilization giving you the amount of Integrate 80+ per fertilization cycle.

Drench: Integrate 80+ can be added to drenching water by using a .25-.5% solution.

Ornamental and Agriculture: For preparation of media prior to planting, apply 2 - 6 ounces per cubic yard of mix in 2 gallons of water. Apply when media is blending and mix thoroughly. When plants are in production, apply at a rate of 2 - 6 ounces/100 gallons (200 - 500 ppm of Integrate 80+) directly to the media via drip irrigation.

Turf: Initial application of 1 pint per acre followed by 0.5 to 1 pint per acre monthly or as needed. Additional applications may be needed for extremely dry conditions in hydrophobic soils.

Integrate 80+ applications may be made more frequently such as weekly or biweekly while maintaining the required monthly rate after the initial application.

Application Methods: Drip, Center Pivot, Overhead Irrigation, Boom Sprayer or drench. Integrate 80+ is compatible with most liquid fertilizers and may be blended and injected via irrigation system. Standard compatibility jar test is recommended.

For more details on crop specific application please contact
Belchim Crop Protection 855-445-7990.

PRECAUTIONARY STATEMENTS

Wear eye and face protection, protective gloves, protective clothing. If in eyes: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do. Continue to rinse.

FIRST AID

Ingestion: Wash out mouth with water

Skin Contact: Wash immediately with plenty of soap and water

Eye Contact: Bathe eye with running water for 15 minutes

Inhalation: Consult a doctor.

SPILLS AND LEAKS

Wear appropriate protective clothing. Absorb into dry earth or sand. Transfer to a closable, labeled salvage container for disposal by an appropriate method.

STORAGE AND DISPOSAL

Store only in original container in a cool and dry area. Protect from frost. To avoid waste, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

FIREFIGHTING

Use carbon dioxide, dry chemicals, foam, water or water fog. Firefighters should wear full emergency equipment and NIOSH approved positive pressure self-contained breathing apparatus.

OBSERVE ALL PRECAUTIONARY LABELING

For emergencies involving a spill, leak, fire, exposure or accident contact: CHEMTREC (800) 424-9300 or 1-730-527-3887 (international calls). This call can be made collect.

The use of this material being beyond our control and involving elements of risk, we do not make any warranty, express or implied, as to the effects of such use, when this product is not used in accordance with the directions as stated on this label.
