

IRONFIST

Slug & Snail Bait

Broad Spectrum Control of Slugs and Snails

Active Ingredient:
2% Ferric Sodium EDTA

Slugs & snails are highly sensitive to iron toxicity and are readily attracted to the carriers in IronFist™. Sodium Ferric EDTA is a stomach poison. Once ingested by the slug/snail, IronFist immediately inhibits further feeding and kills them in 1-3 days.

- IronFist's mode of action is different than metaldehyde based baits, which cause dehydration by destroying the slug's mucus producing cells (typically resulting in a "slime trail").
- Dead slugs and snails may not be visible in areas treated with IronFist, as they often crawl away to secluded places to die.
- Sodium Ferric EDTA has extremely low non-target toxicity; virtually harmless to higher animals including mammals, birds, and fish.
- Earthworms and other ground dwelling beneficials are not affected.
- Can be used around pets and wildlife, with no re-entry restrictions.
- The bait pellets are biodegradable, releasing iron into the soil for plant uptake.
- No aquatic toxicity or ground water contamination issues.

QUICK FACTS:

- Proven Performance- Kills Snails and Slugs
- Small uniform pellet size maximizes baiting points
- Effective in all weather conditions, including cool and wet
- Ideal for application at planting
- Registered for use on ornamentals, shrubs, gardens, turf, citrus, vegetables, fruit trees, berries, etc..

Application Instructions:

May be applied at a rate of 1/4 to 1 pounds per 1000 ft² (1 teaspoon/yd², 10 - 40 pounds/acre). Under normal pest pressure use at the low end of the rate range. Apply at the high end of the rate range if the infestation is severe or after long periods of heavy rain. Scatter the bait on the soil around or near plants to be protected. Re-apply as the bait is consumed. Do not place in piles. Read the entire label prior to use.

Packaging:

25 pound bag
50 pound bag

THE IRONFIST ADVANTAGE

Slug & Snail Bait

IronFist is easy to use and a less toxic option to effectively control slugs and snails in a variety of environmental conditions, including wet and cool weather. See the chart and graphs below summarizing IronFist's safety and performance.

IRONFIST

Slug & Snail Bait

Very low toxicity
(Oral LD50 = >5000 mg/kg)

Slugs and snails disappear and die, no cleanup

No ground- or surface water contamination

Will not contaminate water when used according to the label directions

Rain Fast, Immediate Irrigation allowed

MRL-exemption allows use on most food crops

Broadcast applications not restricted

No restrictions on contact with plants or edible parts of crops

Can be used around animals (pets) and wildlife. May be used in areas where there are dogs, cats, & birds. Won't harm earthworms. Can be used around grazing animals.

Can be applied to dry and wet soil

First aid language about possible eye irritant

May be re-applied as soon as bait is consumed, no annual maximum

Quality, Dust-free, Even Sized Formulation

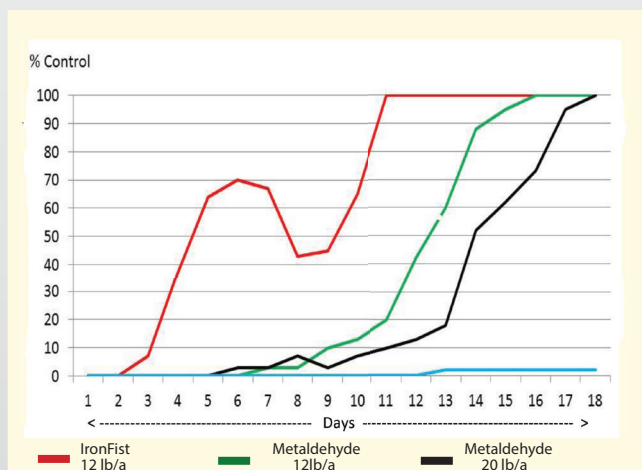

Photo shows snail eating a piece of IronFist in a flower bed.

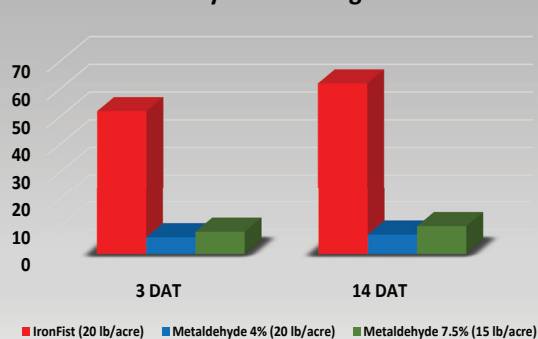

Mortality Rates of Slugs

Based on 20 slugs exposed to bait on day one and 20 additional slugs introduced to the bait after 7 days.

Please read label for complete application instructions prior to use. IronFist is not registered in all states. Contact your local Belchim Corporation USA representative for the latest information.
